Increase engagement using technology

Increase online engagement using technology and become a versatile online facilitator

DESCRIPTION

Technology for online class delivery has made an enormous step in the last two years due to the COVID-19 crises. You might be familiar with Microsoft Teams and Zoom, but you want to increase engagement for your delegates during your sessions. This program helps you using new tools and provide hands-on examples to increase engagement without having any programming skills or an engineering degree. We guarantee that your lessons and programs will reach higher evaluation scores when you use our tips and tools to enrich your clients' learning experience.

PROGRAM OBJECTIVES

At the end of this program, delegates will be able to:

- Understand engagement, preferred styles and attention span of your audience
- Learn different tools to enhance engagement
- Discover software options from Google and Microsoft to use in your sessions
- Learn how to use technology for engaging exercises in online meetings
- Understand the applications of other third-party software (free and paid) to use in your programs to astonish your audience
- Enhance your level of knowledge on using Zoom and Microsoft Teams
- Be able to work with OBS software in order to produce scenes and have a basic understanding of the essentials of the software
- Using lighting, green screen and camera settings to gain attention on screen
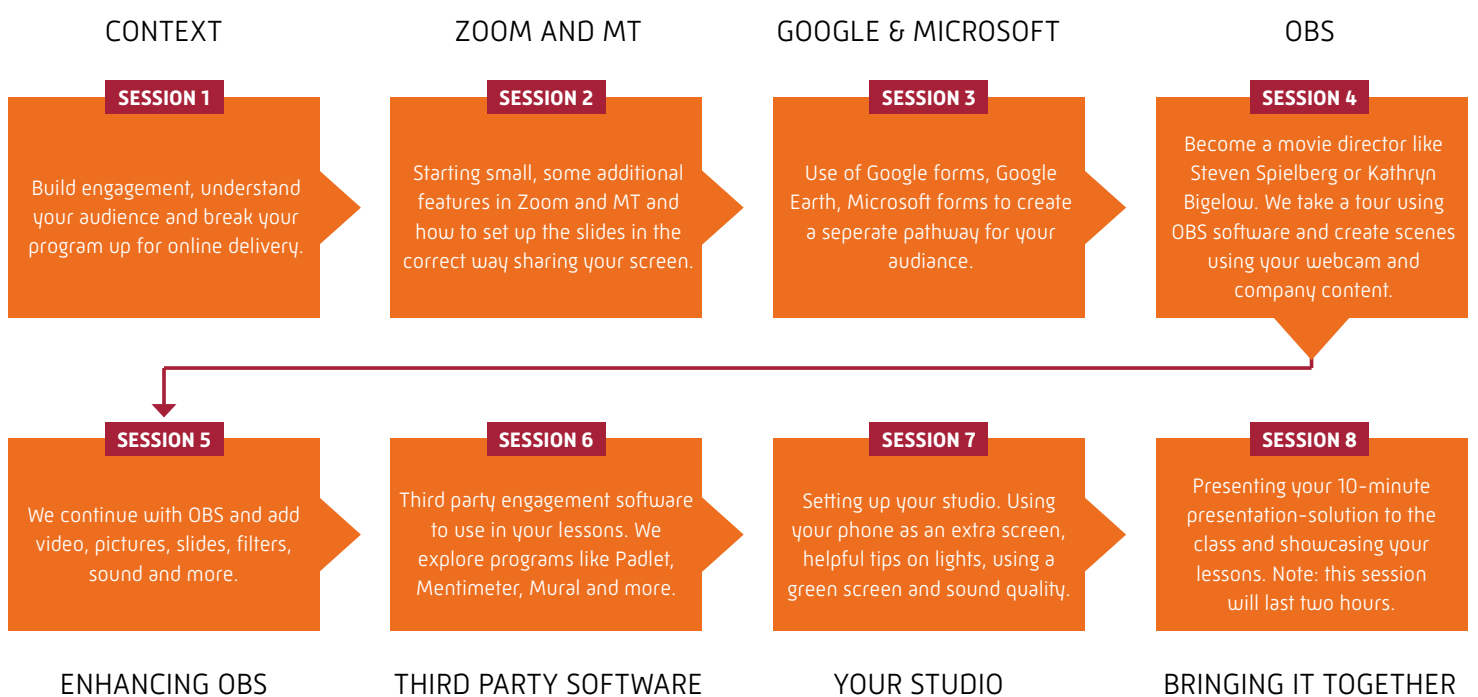

FORMAT/DURATION

- Eight live online sessions of one hour each either by using Microsoft Teams or Zoom (dependent on company policy)
- In company program
- Minimum 12 and maximum 18 participants
- Modules can be merged into longer sessions on request

INVESTMENT

Investment € 4250 *(excluding VAT)*

This is less than 27 euro per delegate per hour.

CONTEXT

SESSION 1

Build engagement, understand your audience and break your program up for online delivery.

ZOOM AND MT

SESSION 2

Starting small, some additional features in Zoom and MT and how to set up the slides in the correct way sharing your screen.

GOOGLE & MICROSOFT

SESSION 3

Use of Google forms, Google Earth, Microsoft forms to create a seperate pathway for your audiance.

OBS

SESSION 4

Become a movie director like Steven Spielberg or Kathryn Bigelow. We take a tour using OBS software and create scenes using your webcam and company content.

SESSION 5

We continue with OBS and add video, pictures, slides, filters, sound and more.

SESSION 6

Third party engagement software to use in your lessons. We explore programs like Padlet, Mentimeter, Mural and more.

SESSION 7

Setting up your studio. Using your phone as an extra screen, helpful tips on lights, using a green screen and sound quality.

SESSION 8

Presenting your 10-minute presentation-solution to the class and showcasing your lessons. Note: this session will last two hours.

ENHANCING OBS   **THIRD PARTY SOFTWARE**   **YOUR STUDIO**   **BRINGING IT TOGETHER**
